

Indian Doctors Association

Greater Houston

February 2020 Edition

President's Message

IDA hits 2020 with a great momentum of developing its vision on **“Connect, Inspire, & Community.”**

IDA reinforced **“STEM”**, a curriculum based on educating students in four specific disciplines — **Science, Technology, Engineering and Mathematics**. The STEM program teaches & encourages collaboration, creativity, and problem-solving. During the elementary school session on January 24th, children had to opportunity to experience real-life situations to help them learn. Different medical equipment and animated medical devices were provided to the children. 150 lunch bags with First Aid Safety Kits, hot & cold packs, and hand sanitizers were provided to all the students.

IDA partnered with Pearland High School to enhance high school students with leadership qualities. Pearland high school senior class officers worked with IDA leadership in developing an outreach program with the Houston Food Bank. Houston Food Bank recently was forced to throw away about \$2.7 million worth of food after an ammonia leak. Pearland Senior Class Officers assisted with formulating an action plan, designing “The gift of time” Food Drive T-shirts, recruited volunteers to pack and sort food and products at the food bank, and fundraising. IDA contributed \$1,000 to Pearland High School for successfully implementing the action plan and for prospective educational & mentoring programs. IDA will continue to build these programs throughout the Greater Houston Independent School District. These programs are designed to bring real life Doctors’ experiences to the educational systems to enhance students with successes and challenges and to nurture our future leaders.

On January 24th, Texas Medical Center Mixer at the 3rd Coast Restaurant was a sold out event. Over 50 guests had the opportunity to mix and mingle while exchanging business cards. Evening was

capped off with a delicious dinner and surprise raffle prizes.

Look forward to seeing you at any or all of our upcoming events. Please follow us on social media and our website for updated and past events.

President*

MEMBERS CORNER

*New Annual Member
Srikanth Katragadda, MD*

This is Srikanth Katragadda MD am one of the new internal medicine physicians who joined Kelsey Seybold clinic here in the Woodlands, Tx. I am glad to be writing this short note about myself as I join the Indian Doctor Association of Houston.

I was born and raised in Guntur, Andhra Pradesh, India. I obtained my medical degree from Guntur Medical College. After graduating from Medical school 2006, I moved to the US. I was involved in cardiovascular research at the VA Medical Center in Chicago for a year. It was a great experience for me that paved the way for

further research, which always helped me throughout my career. I completed my Internal Medicine residency from Toledo, Ohio in 2011, where I was also a chief resident in my final year. Then we moved to Iowa where I practiced from 2011-2019 at McFarland Clinic in Ames Iowa.

We moved to Houston in July 2019. The diverse ethnicity, food and cultural scene in Houston remind us of our home in India and attracted us to be part of this great city. We currently live in the Woodlands. We see great opportunities for our kids as they grow up; not only in Houston but in Texas. We already got to meet some great people from India both physicians and non physicians at various interactions. I am very glad to join the Indian Doctors Association Houston.

I have attended some of the sessions organized by IDA Houston. I am impressed with how active this group is in not only networking with other providers as well as some of the charitable work being done in the society.

I also enjoy participating in research activities. I was part of clinical studies as a principal investigator with PMG research while working at McFarland clinic. I envision myself being involved in the activities of IDA more in the near future.

I was glad to find a great cricket league here in Houston for which I play for during my weekends. I Love spending time with my family, wife Saisree and 2 kids Sahsara and Sarayu who are 6 and 8 yrs old.

Thank you for giving the opportunity here to introduce myself to the IDA community.

February is American Heart Month

Help spread awareness in our community!

South Asian Americans are more likely to die from heart disease than the general population. With high rates of abdominal fat deposition, type 2 diabetes and hypercholesterolemia, carbohydrate-heavy diet and poor exercise habits, the desi community is at high risk for cardiovascular events and mortality. We physicians can help spread awareness about this risk and what can be done to improve health outcomes. As a reproductive endocrinologist and PCOS specialist, I diagnose many young desi women with diabetes and an overall poor lifestyle - and so this February, with American Heart Month and the #GoRedforWomen campaign, I'll be promoting a heart-healthy lifestyle via Instagram (@rkudesia). I will be focusing on how young women can stay healthy throughout their reproductive years and avoid fertility and pregnancy complications, but am looking for other IDA docs to join in! If you are active on social media, or would like to have your voice shared, please email me at rashmi.kudesia@gmail.com so we can work together to get the word out! I am looking for short blurbs or videos to help convey in simple, patient-friendly language how your clinical experience has demonstrated the need for South Asians in the US to focus on heart health. #OurHearts matter!

Update From 2019 IDA Scholarship Recipient

Christiana Okafor

Since receiving the Indian Doctors Association Scholarship, I graduated as a Valedictorian from the High School for Law and Justice in June 2019. After choosing to attend Bowdoin College (in Maine) on a full ride, I got accepted into the Geoffrey Canada Scholars Program, which is a college immersion program here on campus that allowed me to start college 6 weeks early last July. I am on Pre-Medical Track and I plan to Major in Integrative Biology and Anthropology/Sociology or Political Science. When not in the midst of studying for my courses including Chemistry, Calculus, and Cultural Anthropology, I serve as a First Year Representative for the Black Student Union, a Development Representative for the Bowdoin Student Government and the Diversity Inclusion committee here on Campus. I am also an Eco Representative for my dorm building, where I support, drive, and support sustainability practices on campus and abroad. Similarly, I serve as a college preparatory coordinator for Maine's Upward Bound Chapter here on campus, as well as working as an Annual Funds Ambassador for Alumni Outreach. This January, I returned to campus 2 weeks early on January 3 as Bowdoin Science Scholar to attend immersive labs and lectures to study practices that support success in STEM fields.

Among this, next week, I will be attending a highly selective Exploratory Career Conference with Goldman Sachs in New York City, and in March, I will be participating in a week-long spring break trip on the Tijuana, MX/San Diego, CA

border to learn about the socio economic issues affecting immigrants on both sides of the border.

I am forever grateful for the Indian Doctors Association Scholarship because it has allowed the burden of indirect costs such as travel, winter clothing, toiletries, books, lab equipment, etc. to be greatly decreased. Coming from a low-income, first generation background while being at a prestigious institution like Bowdoin comes with many challenges, and knowing that I can buy the supplies that I need to succeed is something that makes success more attainable. Thank you so much and I look forward to future contact with you all!"

IDA Speakers Bureau

Please update your membership profile on idahouston.org if you would be interested in becoming a motivational speaker for IDA at our future events.

Scholarship Application

The 2020 IDA Scholarship Application is now active on the IDA website. Submissions are February 28th, 2020.

Pictures from IDA's Elementary and High School Mentoring Program and IDA's TMC Networking Event can be found on the IDA website.

Conference Speakers

CME CONFERENCE SPEAKERS

DIVYA REDDY

Senior Corporate Counsel
Session 1: "Innovations & Artificial Intelligence"

Divya is Senior Corporate Counsel for the Methodist Hospital System. She is responsible for directing and performing general corporate legal functions and serves as counsel for IT, Supply Chain, Revenue Cycle and for Houston Methodist's Center for Innovation. In her role as counsel for Houston Methodist, she also sits on the Medical Device/IT Security Committee, the Physician Peer Review Committee, the Corporate Business Practices Committee, and the Conflict of Interests Committee among others. Divya also provides legal counsel and guidance to internal clients on matters pertaining to contract disputes, policies and procedures, current healthcare legislation and legal implications of strategies and activities of system entities. Prior to joining Houston Methodist, Divya was in private practice where her primary area of expertise was medical malpractice defense of hospitals and physicians. Divya graduated Bachelor of Science in Political Sciences, Texas A&M University; Doctor of Jurisprudence, University of Houston Law Center.

CME CONFERENCE SPEAKERS

KYLE PRICE

Senior Vice President/Chief Executive Officer
Keynote Speaker
Session 1: "Business Of Medicine"

Kyle is the Sr. Vice President and CEO of Memorial Hermann Southeast and Pearland Hospitals and provides executive oversight for the Heart and Vascular service line across the System. Kyle has served in a variety of leadership roles for Memorial Hermann including director of imaging and oncology services, administrative director of ancillary services, and administrative director of service lines. Kyle played a key role as a member of the administrative and leadership team responsible for the development of Memorial Hermann Pearland Hospital. Kyle holds an associate degree in radiological sciences from South Arkansas College, a bachelor's and master's degree in business administration from LeTourneau University, and is a graduate of the Advisory Board Fellowship in Washington, D.C.

CME CONFERENCE SPEAKERS
